EDUCATION

Ecole Superieur DE VINCI — **Paris, France**
MSc Cyber Security and Crisis Leadership M2 — *Graduation Date: Oct 2026*

International University of Agadir — **Agadir, Morocco**
Engineering Degree in Computer Science — *Graduation Date: July 2025*

Holberton School — **San Francisco, California**
Full Stack Software Engineering — *Graduation Date: Apr 2024*

WORK EXPERIENCE

VOID — **Agadir, Morocco**
Devops Engineer — *March – August 2025*

- Creating custom Docker images and containerized deployment pipelines for **NextJS/Drupal** projects, ensuring high availability and security for critical operations for financial clients.
- Configured a physical server with **Docker/EasyPanel** and synchronized it with a preprod server in another city/office.

Orange Maroc — **Agadir, Morocco**
Technical Project Lead — *July - Sept 2024*

- Led a team of **6** to develop a smart IoT device: **ODAC**, to monitor health metrics with **AI**-driven threat detection, resulting in a **30%** reduction in response time to medical emergencies.
- Executed a simulated cyber-attack with **Infection Monkey**, identifying vulnerabilities and documenting a containment plan for implementation. Conducted vulnerability assessments using **Snort** and **Wireshark**, identifying **25+ critical vulnerabilities.**

OCP Benguerir — **Benguerir, Morocco**
Cybersecurity Engineering Intern — *May – July 2024*

- Designed secure architecture for an intern ERP solution: on-call scheduling web application, which automated rotations, reducing scheduling errors by **20%** and increasing transparency for **100+** employees.
- Enhanced enterprise security posture by implementing **OSSEC** HIDS across **10+** critical servers and integrating it with **IBM QRadar SIEM**, resulting in **60%** faster threat detection and a **40%** reduction in false-positive security alerts.

LECOURS CONSULTING STARTUP — **Agadir, Morocco**
Junior Software Engineer Intern — *July - August 2023*

- Collaborated with the development team tasked with designing and implementing a web application aimed at fully digitizing and streamlining the business creation process in France.
- Performed comprehensive penetration testing on the startup's platforms and ensured **NIST/ISO 27001** compliance - safeguarding €30M in assets and helping the company avoid regulatory fines.

PROJECT EXPERIENCE

SAYO ANTIVIRUS — ***Apr - June 2024***

- Architected a signature-based antivirus system by implementing **YARA** rules for pattern matching and integrating **VirusTotal** API, achieving malware detection across multiple scanning modes (quick, full, and scheduled scans).
- Developed a comprehensive security solution combining machine learning model trained on malware signatures with **Python/Tkinter** GUI interface, enabling both manual and automated threat detection with quarantine capabilities.

SABIB — ***Jan - June 2024***

- Founded and led a smart water management startup by directing a team of 5 engineers and implementing IoT architecture (**Fritzing**, **C**), resulting in a successful product showcase reaching 100+ potential customers and 400+ waitlist signups.
- Engineered an AI-driven irrigation monitoring system by analyzing farmers' water consumption patterns across 3 test fields, resulting in 35% water conservation for crop irrigation

LEADERSHIP EXPERIENCE

Google Developer Groups — **Agadir,Morocco**
Team Leader — *Oct 2023 - Aug 2025*

- Nominated Leader and member of the central committee at GDG Universiapolis, giving talks creating educational content, podcasts, and workshops that strengthened the club's learning ecosystem and reached over 500 student members.

SecPolis Club — **Agadir, Morocco**
Founder & Team Leader — *Oct 2024 - Aug 2025*

- As the founder of SecPolis, the official cybersecurity club representing my university, I built a team of **20+** passionate students and led our participation in over **10 CTF competitions**.
- Organized internal CTF competitions to hone SecPolis members' cybersecurity skills, while also hosting open security classes for **200+** university students, fostering enthusiasm for the field and imparting fundamental concepts.

CERTIFICATIONS

CCNA: Introduction to Network | **Professional Cloud Security Engineer by Google** | **Google Cybersecurity By Google**

SOFT SKILLS

- Critical Thinking - Client Communication - Problem-Solving - Innovation - Resilience - Team Player
